

**BUILDING  
AUTOMATION SYSTEMS**

**Efficient controls  
systems that save  
you time and money.**

EMCOR Services Northeast specializes in the design and installation of building automation controls and building automation systems—from the latest internet-based open-architecture technologies to complex process systems

**Integrated, centralized  
building controls systems**

Air conditioning, lighting, heating, power generation, new or retro installations—the more integrated your systems, the more likely you'll achieve high performance operation, reduced energy consumption, and maximum cost savings. Our automation team combines seasoned controls engineers with top-of-the-line LEED accredited professionals, programmers, and mechanics to provide our clients with tightly integrated, centralized operational control.

**Building controls services:**

- > Detailed control prints and as-built drawings
- > Reliable service
- > State-of-the-art graphics
- > User friendly interfaces
- > Remote access
- > Energy savings
- > 3rd party equipment integration

**We specialize in servicing  
these control systems  
manufacturers:**

- > i-Vu
- > Carrier
- > Johnson Controls
- > Tridium

**Contact us today to learn  
more about our building  
automation services.**
